### Regional West Medical Center

---

308-635-3711

4021 Ave B Scottsbluff, NE

Regional West Health Services in Scottsbluff, NE is the parent company for Regional West Medical Center and Regional West Physicians Clinic. These organizations, with over 1,800 employees, provide comprehensive and innovative health care services for the people and communities of western Nebraska and the neighboring states of Colorado, South Dakota and Wyoming. With over 110 active physicians, 95 percent of whom are board certified or board eligible, plus and additional 25 consulting specialists, the Regional West family of health care organizations offers care that spans more than 30 medical specialties.

Regional West Medical Center is the primary regional referral

center serving western  
Nebraska and parts of adjoining states. It is a community  
operated not-for-profit organization, which willingly serves  
anyone in need and reinvests all of its financial  
resources toward improving health care in its service area.  
Regional West Medical  
Center's talented and dedicated staff has helped it to expand  
services to include  
Level II trauma care, award-winning cancer treatment, and  
acute rehabilitation  
as well as to become a Bariatric Center of Excellence. Our  
goal, working   
cooperatively with hospitals across the Nebraska panhandle,  
is to provide the  
complete care patients need, close to home.

Regional West Physician's Clinic is the newest subsidiary of  
Regional West Health  
Services. Over 60 physicians and 18 mid-level providers  
comprise Regional West  
Physician's Clinic, and represent 17 specialities in  
individual clinics. The organizational  
model is similar to that used by the Mayo Clinic, the  
Cleveland Clinic, and Billings Clinic.  
All physicians credentialed at Regional West were given the  
opportunity to join.  
Those who chose not to participate in the new medical group  
when it formed  
in 2008 are welcome to apply for inclusion in the future. In a  
move described as  
one of the top two or three most significant events in  
Regional West's history,  
the hospital and physicians now share leadership in improving  
quality management  
and patient care. With physician hospital integration, Regional  
West physicians  
have more time to devote to patient care, health care  
governance and  
leadership, and community outreach.
